

House Bill 2460

House Bill 2460 as amended, requires that one percent of the amount appropriated for the construction or alteration of state buildings on the capital mall and adjacent thereto be expended for works of art. These works of art may be an intergral part of the building, attached thereto or capable of display in other state buildings.

Determining the art works to be acquired would be the responsibility of the Arts Commission, the Capitol Planning Commission and the Department of General Services. Authority is also contained in the bill which would permit the transfer of works of art between buildings.
